

International OBSERVE THE **MOON** NIGHT

October
SAVE THE DATE 5TH
2019

International Observe the Moon Night is a worldwide celebration of lunar science and exploration. One day each year, everyone on Earth is invited to observe and learn about the Moon together, and to celebrate the cultural and personal connections we all have with our nearest neighbor.

PARTICIPATE

How can you participate? All you need to do is look up! You can host an event or observe on your own. Events range from small family gatherings to community events that draw hundreds of visitors. For more information about International Observe the Moon Night and how to get involved, visit moon.nasa.gov/observe.

CELEBRATE LUNAR EXPLORATION

International Observe the Moon Night is sponsored by NASA's Lunar Reconnaissance Orbiter (LRO). 2019 marks the 50th anniversary of the Apollo 11 Moon landing and the 10th anniversary of LRO in lunar orbit. These anniversaries present an opportunity to discuss the past, present, and future of lunar and planetary science and exploration at your events.

REGISTER

You can register for International Observe the Moon Night on our website (moon.nasa.gov/observe). There are two different types of registration – event hosts and individual participants. As an event host, by registering, you will promote your event, gain access to the most up-to-date event materials, and become an official part of International Observe the Moon Night. As a participant, you will get the latest lunar news and connect with a global community of lunar observers.

Each year, thousands of people across the globe participate at:

- Museums/science centers
- Libraries
- Planetaria/observatories
- Schools
- Universities
- Public parks
- Community centers
- Private residences/businesses

“Every time I see the Moon,
I always get more curious.”
